

KISAN APPS

In this age of digitalization, Kisan applications can be rendered as the boon to the farmer community. Government of India's emphasis on digitalization in farming sector can be attributed to this change. Agriculture, though, it is a traditional industry but nowadays it is becoming tech-oriented. The farmers are now open for new innovative and productive technologies. In response to this many agricultural apps are available online with each having a specific emphasis on some sector of farming community.

But [Kisan app](#) is a one stop solution for the farmers and the agricultural enthusiasts with all the services one could expect from an agricultural app. This app provides 360 degree solutions for the farmers addressing end to end needs. It is giving farmers a hope for a sustainable increase in productivity. It updates posts every day and instantly makes all information available, which is valuable for modern agriculture such as Weather Forecast, Market Demands, Prices, Information about Seeds, Fertilizers, Soil Quality Checks and Various crops options. It connects small farmers to their various needs for crop and agricultural advisory along with market linkage through a wide network of trained Micro -Entrepreneurs.

Also this [Farmer's app](#) provides you with professional help from agricultural experts free of cost . one can upload a picture or a doubt online and can seek help for clarification. Helpline can be rendered as a boon to the farmers and all these services are made available in both Hindi and English for better reach among farmers.

Overall one can say that this is the best kisan application one could come across. Hope it acts as an aid for the better development of modern solutions for Indian Agricultural problems.
